

testimonials

I was bitten by a wasp on the job site. Really painful but I used the bite away and the pain was gone in seconds and only an hour later when I checked the swelling had gone as well.

Now I always have one in my work truck.

..... Ashley, Electrician.

My child comes up in red welts when bitten by Mosquitoes so we have to be so careful. Now we use the bite away and no more reaction.

..... Cindy, Nerang.

I recently used the bite away after being bitten by sand flies. Usually I react really badly with redness and itching for days. One application to each bite and the itching stopped. It was quick, painless and easy to use. I highly recommend bite away as a useful addition to the home and travel medical kit.

..... Libby.

My wife bought a bite away and I thought she had wasted her money but we had a BBQ with friends over and everyone was using our new bite away. Results were sensational.

Great product.

..... George, Converted Sceptic.

I now keep a bite away in my tackle box. It's quick, easy and stops the itch fast so I can get back to my fishing.

..... Jo, Happy Fisherman.

bite away[®]

INSTANT relief from insect bites & stings

Medical device for the external treatment of insect bites and stings.

This device works on concentrated heat, approx 50°C by an integrated microprocessor chip and maintained for 3 to 6 seconds depending on which button you select.

Insect poison/protein is denatured and the histamine release is therefore prevented.

NO SWELLING, NO PAIN, NO ITCHING

Suitable for over 300 applications. Then just change the batteries and keep healing!
